

Measuring your boat for a Fish and Ski full over cover

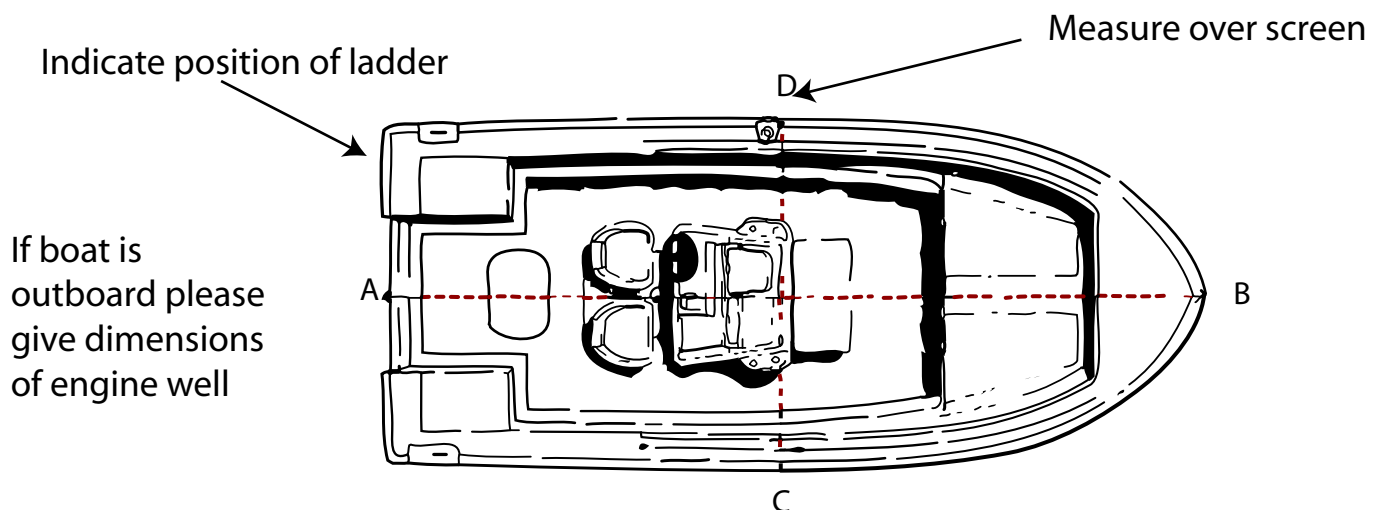

Measure the boat from point A at the stern of boat to point B at bow of boat, rub strip to rub strip or fender, taking the measurement up and over the top of the windscreen. Make sure that you take the measurement over the highest part of the windscreen. If outboard is in place then measure at the side of the engine.

Record measurement in inches A to B.....

Measure the boat from point C to D taking the measurement from the rub strip at one side of the boat to the rub strip at the other side of the boat, going over the top of the windscreen.

Please notify us if you have any rails or ladders added. Indicate on the plan whether the ladder is port or starboard, the width of the ladder and how many inches it is in from the outer edge of the boat.

Model shown is inboard version.

Record measurement in inches C to D.....

If you need any help please ring Dave on 01834 812115

Please telephone, email (using enquiry form on website) or post these measurements to us.
